SUMMARY

Full Stack Web Developer utilizing financial advising background to analyze complex problems and build creative solutions. Certificate in full-stack development from the University of Arizona with an emphasis on JavaScript, Node.js, React, CSS, and HTML. My experience with customers has helped me to understand what consumers want and how to deliver those features. Focusing on mobile-first design and intuitive features, my goal is to create applications that users connect with and enjoy using.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS

Applications: MERN stack, JQuery, MySQL

Additional Skills: TDD, PWA, Agile project management, Git, MVC, RESTful API, CRUD

PROJECTS

Rotten Potatoes | https://github.com/Nmosch/P2_Valar_Morghulis_Movie_Ranker | <https://rotten-potatoes-vm3.herokuapp.com/login> (username:rottenpotatoes@test.com|pw:1234)

- Full stack app that lets users rate their favorite movies, see the average ranking of movies in particular categories, and see the total movies rated per category
- My focus was back end route handling and database querying
- Handlebars, JavaScript, chart.js, MySQL, Node.js, Express, Sequelize were used in the development of this app.

Cal.Culator | <https://github.com/Nmosch/Cal.culator> | <https://nmosch.github.io/Cal.culator/>

- App that allows users to search for foods and add those foods to their meal plan. The total macronutrients are calculated for the selected foods and compared in a chart against the FDA RDA.
- My focus was creating the chart, rendering the elements for the list of foods, and the calculation for the total macronutrients based on foods selected
- HTML, CSS, JavaScript, Highcharts.js, Foundation, APIs. This app mainly focused on front-end technologies

EXPERIENCE
